14.- Information of the use of other websites and social networks

The company is only responsible for the contents and the management of the websites of which it is the owner or has a right of similar nature. Any other website or social network or repository of information on the Internet, outside of this website, is the responsibility of its legitimate owners.

ATOMIAN COGNITIVE ARCHITECTS, S.L. collaborates in an ordinary way with different applications and webs environments, and it always recommends to the users that, before accessing in these websites, please read accurately the corresponding legal advertisement and privacy policy, and only access them once they have understood and accepted in its entirety legal text.

ATOMIAN COGNITIVE ARCHITECTS, S.L. is committed to control the contents that are exposed in these social networks and will expel those users who make an incorrect use in them.

ATOMIAN COGNITIVE ARCHITECTS, S.L. recommends, following instructions from the National Institute of Communication Technologies (INTECO) and the Spanish Agency for Data Protection (AEPD), for the use of social networks or navigation in Web environments, the execution of the following actions:

- It is recommended that all users resort to the use of personal pseudonyms or nicknames with which to operate over the Internet, allowing them to have an authentic “digital identity” that does not compromise the security of their personal and professional lives.
- It is recommended that users take special care when publishing audiovisual and graphic content in their profiles, since in this case they may be placing the privacy and privacy of people in their environment at risk.
- It is recommended to review and read, both in the moment prior to user registration, and subsequently, the general conditions of use and the privacy policy that the platform makes available on their websites.
- It is recommended to adequately configure the degree of privacy of the user profile in the social network, so that it is not completely public, but only those people who have been classified as “friends” have access to the information published in the profile or “direct contacts” previously by the user.
- It is recommended to accept as a contact only those people known or with whom you have a prior relationship, not compulsively accepting all contact requests you receive and investigating whenever possible and necessary, who is the person requesting your contact through the social network.
- It is recommended not to publish in the user profile physical contact information, which allows anyone to know where they live, where they work or study daily or the leisure places they usually frequent.
- To the users of microblogging tools, it is recommended to take special care regarding the publication of information regarding the places where they are always.
- It is recommended to use and publish only content with respect to which there is sufficient intellectual property rights. Otherwise, the user will be committing a civil offense protected by national courts.
- It is recommended that users use different user names and passwords to enter the different social networks of which they are members.
- It is recommended to use passwords with a minimum length of 8 characters, alphanumeric and with capital and lowercase letters.
- It is recommended that all users have installed and properly updated antivirus software on their computers.
- Minors should not disclose excessive personal data. Never give data to strangers.
- All the information concerning the website must be read. It explains who are the owners of the same and the purpose for which the data is requested.

- If the user is under fourteen years of age, the consent of the parent tutors is also needed. In these cases, whenever data is requested by a social network should ask the parents or guardians to see if they approve the subscription or not.
- Usernames and passwords should not be communicated to third parties, nor shared among friends or classmates. These data are private and should not be communicated to third parties and/or strangers.
- Whenever there is any doubt regarding any situation that derives from the use of social networks and collaborating tools, parents or guardians should be asked.
- The computer must be kept in a common area of the house.
- Rules should be established on the use of the Internet at home.
- Parents should know the operation and possibilities of this type of platforms, both positive and negative.
- Activate parental control and platform control tools, as well as establish parent or guardian mail as a secondary contact email.
- Make sure that age verification controls are in place.
- Ensure the correct installation of the content blocker.
- Raise awareness and inform minors about aspects related to security.
- Explain to children that they never have to meet people they have met in the online world and that if they do so it must always be in the company of their parents or guardians.
- Ensure that minors know the risks and implications of hosting content such as videos and photographs, as well as the use of webcams through social networks.
- Control the minor's user profile.
- Make sure that the child only accesses the pages recommended for their age.
- Make sure that children do not use their full name.

This Privacy Policy may vary over time due to possible legislative changes, jurisprudence or by the criteria followed by the Spanish Agency of Data Protection and/or the competent authority in any time. That is why ATOMIAN COGNITIVE ARCHITECTS, S.L. reserves the right to modify the legal advice. In this case, ATOMIAN COGNITIVE ARCHITECTS, S.L. will announce in this website, the changes introduced with sufficient advance to its implementation.
